

The Weekly Dig – August 19, 2016

Mick Carew, PhD | 604-697-6006 | mcarew@haywood.com and the Haywood Mining Team

Fed Minutes Send Gold Higher Before Late-Week Fall

It was another up and down week for the yellow metal after minutes from the July Federal Reserve meeting showed officials were split over whether to raise interest rates; Some preferred to wait because inflation remained flat, while others were eager to go sooner as the labour market nears full employment. Precious metals prices are likely to remain volatile at least over the short term as Investors search for additional clues on the body's next move during Fed Chair Janet Yellen's speech on the August 26 in Kansas City. Following the Fed's minutes, the price of gold (\uparrow 0.3%) rose briefly above \$1,350 before settling at \$1,344 per ounce Friday. The rising gold price coincided with a weakening U.S. dollar; in particular, the Canadian dollar finished at 0.78 U.S. cents on Friday. Mining equities were generally flat this week; the S&P/TSX Global Gold index was down slightly, finishing at 261 while the Global Base Metal index was up, finishing at 87.9. The S&P/TSX Venture Composite Index finished flat at 833 on Friday. In other precious metals, Silver (\downarrow 2%) and platinum (\downarrow 0.8%) both fell, finishing at \$19.3 and \$1,114 per ounce respectively, while palladium rose 3% to finish at \$711 per ounce. Base metals had a positive week, with copper (\uparrow 0.77%), nickel (\uparrow 0.45%), lead (\uparrow 2%) and zinc (\uparrow 2%) all up, finishing at \$2.18, \$4.68, \$0.85 and \$1.04 per pound respectively. The WTI crude price surged again, rising 6% this week and 17% since August 2nd on continued speculation that major oil producers may freeze production when they meet in Algeria next month. Finally, the UxC Broker Average Price of uranium was down (\downarrow 1%) this week, closing at \$25.87 per pound on Friday.

Macroeconomic News

United States: The headline economic news for the week came from the Federal Reserve's minutes from its last meeting in July. According to the notes, Federal Reserve officials were split whether they should have raised interest rates in July. Some preferred to wait because inflation remained benign, and others wanted to go soon as the labour market nears full employment. Investors will listen closely for additional clues on timing when Fed Chair Janet Yellen speaks August 26 at an annual symposium hosted by the Kansas City Fed in Jackson Hole, Wyoming. Meanwhile, the Empire State Manufacturing Index dipped 5 points and is back in the red at -4.2 after a brief stint in positive territory. The Econoday Consensus Estimate was for a reading of +2.50, but once again economists were on the optimistic side. On the housing front, U.S. housing starts unexpectedly rose in July as building activity increased across the board, supporting the view that investment in residential construction will rebound after slumping in Q2. In contrast, MBA mortgage applications decreased 4% on a seasonally adjusted basis last week compared with the previous week, according to the Mortgage Bankers Association. Manufacturing had a positive month in July, with industrial production increasing 0.7% last month after a downwardly revised 0.4% increase in June. Last month, manufacturing output rose 0.5%. Consumer prices for the month of July were unchanged as the cost of gasoline fell for the first time in 5 months and underlying inflation moderated, supporting the Federal Reserve's decision to keep rates steady, and casting doubts on the prospects of a Federal Reserve interest rate increase this year. Jobs data continued to remain low, with initial jobless claims coming in at 262,000, below economists' expectations of a slight dip to 265,000. Claims have now been below 300,000 for 76 straight weeks-the longest streak since 1970. Finally, the Conference Board Leading Economic Index rose 0.4% in July, suggesting a possible pick-up in the U.S. economy.

Canada: Canada's <u>Consumer Price Index (CPI)</u> rose 1.5% in the 12 months to June, matching the gain in May. Excluding gasoline, the CPI was up 1.9% year over year in June, equal to the increase in May.

Japan: <u>Japanese exports</u> tumbled at their steepest pace in 7 years as a stronger yen weighed on international shipments. Exports slid 14% year on year (YoY), as forecast by a Reuters poll of economists. This was the tenth month in a row that exports fell from a year earlier. Imports meanwhile tanked 24.7% YoY, worse than the 20.6% decline expected and the largest drop since 2009.

<u>Algold Resources Ltd. (ALG-V, \$0.36) – Drill Results Demonstrate Further High-Grade Potential at</u> Tijirit

Mick Carew, PhD | mcarew@haywood.com, Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa,

CFA | dochoa@haywood.com

Algold announced preliminary results from its Phase I, 10,000-metre RC drill program on its Tijirit property in Mauritania, located approximately 25 kilometres southeast of Kinross' (K-T; not rated) Tasiast gold mine.

Recent results at Eleonore, in combination with previously reported RC drilling results, continue to support the Company's initial interpretation of a high-grade gold zone over 3.1 kilometres. Highlights include the following (all downhole depths):

- Drill hole T16RC027: 16.4 g/t gold over 6 metres from 84 metres
- Drill hole T16RC031: 9.64 g/t gold over 6 metres from 50 metres
- Drill hole T16RC024: 4.23 g/t gold over 6 metres from 28 metres
- Drill hole T16RC032: 9.31 g/t gold over 6 metres from 24 metres.

<u>Arizona Mining Inc. (AZ-T, \$1.83) – 2016 Taylor Deposit Step-out Drilling Continues to Deliver</u> <u>Spectacular Results</u>

Stefan Ioannou, PhD | sioannou@haywood.com, Mick Carew, PhD | mcarew@haywood.com

Drill holes HDS-357 and HDS-358 represent step-outs from Taylor's 39.4 million-tonne National Instrument 43-101 compliant inferred resource envelope announced in early February (refer to Radar Screen, April 19, 2016).

Step-out hole HDS-357, located approximately 900 feet northwest of the existing resource area returned mineralized intercepts that correlate well with intervals previously returned in hole HDS-344 (released in early June). HDS-348 encountered intense alteration and recrystallization of the carbonate host and five distinct mineralized intervals including 32.5 feet grading 7.9% zinc, 14.36% lead, and 6.90 ounces per ton silver. This interval was within a zone of mineralization that returned 75 feet grading 3.86% zinc, 7.02% lead, and 3.39 ounces per ton silver. HDS-357's results supports Arizona Mining's geological interpretation that the Taylor deposit extends onto recently acquired patented claims to the northwest-continuing to demonstrate Taylor's (very) significant size and grade potential. The deposit remains open in every direction except where it transitions to oxide mineralization to the southwest.

Step-out hole HDS-358, located on the northeast side of the Alta Patented Claim in an effort to extend the existing resource envelope to the northeast encountered 8 distinct mineralized intervals including 24 feet grading 22.4%

Other News

SilverCrest Metals Inc. (SIL-V)

zinc, 24.5% lead, 0.41% copper, and 13.3 ounces per ton silver. This interval was within a broader zone of mineralization that returned 58 feet grading 12.17% zinc, 12.12% lead, 0.19% copper, and 6.17 ounces per ton silver.

<u>Gold Standard Ventures Corp. (GSV-V, \$3.74) – High-Grade Gold Mineralization Extended Farther</u> <u>South at Dark Star</u>

Mick Carew, PhD | mcarew@haywood.com

Oxidized, high-grade gold mineralization extended to south – Gold Standard Ventures released the results of two diamond-drill holes from its North Dark Star gold project, situated within its 100% owned Railroad-Pinion project in Nevada's Carlin Trend. These results continue to demonstrate the potential to extend high-grade, oxidized gold mineralization, particularly to the south, although we note mineralization is open in all directions; hole DS16-03B was drilled approximately 100 metres south of hole DS16-08 (126.2 metres grading 3.95 g/t gold, see *Mining Flash*, August 10, 2016) and approximately 400 metres north of the Main Dark Star deposit (National Instrument 43-101 compliant (inferred) resource of 375,000 ounces of gold grading 0.51 g/t gold (at a 0.14 g/t gold cutoff). Highlights from hole DS16-03B (using 0.14 g/t gold cutoff and drilled at -45 inclination) include:

Hole DS16-03B, which intersected 101.2 metres grading 1.50 g/t gold from a downhole depth of 101.5 metres, including 32.3 metres grading 2.87 g/t gold.

IDM Mining Ltd. (IDM-V, \$0.23) – Underground Drilling Yields High-Grade Results at Red Mountain

Mick Carew, PhD | mcarew@haywood.com

More high-grade drill results from Red Mountain – IDM Mining released drill assay results from its Red Mountain gold project, located east of Stewart, B.C. Results released were from four underground drill holes focusing on the Marc Zone, the southernmost zone that is part of the updated National Instrument 43-101 compliant resource estimate that was incorporated into an updated Preliminary Economic Assessment (PEA). The PEA returned an after-tax base-case net present value (NPV)5% of \$86.6 million with an internal rate of return (IRR) of 32.3% and a 2-year payback on initial capital (using a gold price of US\$1,250 per ounce and silver price of US\$15 per ounce). The four holes are part of the Company's Phase 1 drilling program, which includes infill and step-out drilling from the current resource; material from the drilling will also be collected for metallurgical, geotechnical, and hydrological test work.

Other News

SilverCrest Metals Inc. (SIL-V, \$3.03) Share Price: (52-week high/low: \$0.13/\$3.25) Daily Average Volume for the Week: 1.04 million Market Capitalization: \$120 million Shares Outstanding: 40.72 million Cash: \$4.2 million (July 2016) Date of Release: August 18, 2016

<u>Event</u>: SilverCrest Metals announced an update on the underground rehabilitation program with additional assay results from underground channel sampling at its Las Chispas project located in Sonora, Mexico.

Results: The most significant composited sample results for the William Tell include:

- South 650 level average: 1.12 metres wide grading 3.23 grams per tonne (g/t) gold and 518 g/t silver, or 760 g/t silver equivalent (AgEq, uncut, undiluted) over a continuous 21-metre strike length
- North 450 level average 2.13 metres wide grading 5.7 g/t gold and 257.7 g/t silver, or 685 g/t AgEq (uncut, undiluted) over a continuous 30-metre strike length.

Implications: Grab samples from historical underground workings continue to deliver high-grade silver intersections that were followed-up by the Company's Phase 1 surface drill program, which included a total of 22 holes over ~6,400 metres. Results are expected over the coming weeks. A combined 19 holes have been drilled in the Las Chispas and William Tell veins, and three holes have been drilled in the La Victoria area located near the Babicanora vein. In addition, the Company is also planning on conducting an underground drill program that will comprise approximately 2,000 metres, which is expected to start in late Q3 or early Q4, depending on the receipt of the underground drilling permit. The underground drill program will focus on delineation of a potential bulk sample and infill drilling in preparation for the initial Las Chispas resource estimation.

Haywood Research: The Week in Review

Publications from the Haywood Research team for the week included the following:

- Q2/16 financial results from Asanko Gold Inc. (AKG-T)
- Drill results from NewCastle Gold Ltd. (NCA-V)
- An option agreement between Osisko Gold Royalties (OR-T) and Osisko Mining (OSK-T)
- Site visit notes from Osisko Mining's (OSK-T) Windfall Lake in Quebec
- Q2/16 financial results from Roxgold Inc. (ROG-V)
- Q2/16 financial results from Royal Nickel Corp. (RNX-T)

Asanko Gold Inc. (AKG-T, \$5.81) - Q2/16 costs higher than expected as ramp up continues into July

Geordie Mark, PhD | gmark@haywood.com, Benjamin Asuncion | basuncion@haywood.com

Q2 Financials: Asanko reported Q2/16 financials with revenues of US\$43 Million, EBITDA of US\$11 million and operating cash flow of \$11.6 million (US\$0.06/sh). Revenues came in at \$43 million for the quarter on the sale of 35,074 oz gold at an average price of US\$1,231 per ounce. These data came in largely in-line to a little lower than our estimates of US\$43 million in revenues, and EBITDA of US\$16 million with operating cash flow \$11 million (US\$0.06/sh). Individual unit costs for Q2/16 were reported at US\$3.74/t for mining costs, US\$13.79/t for milling costs, and ~US\$31.3/t for estimated total per milled costs. In addition, the Company reported total cash costs of US\$846/oz and AISC of US\$1,280/oz (including US\$346/oz deferred stripping costs), which came in higher than our expectations of US\$700/oz and US\$841/oz. As noted above we believe such costs will project lower at higher mill throughput and gold production rates (e.g., delivered in July).

NewCastle Gold Ltd. (NCA-V, \$1.03) – Drill Results Demonstrate Upside Potential

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochoa@haywood.com

This morning, NewCastle reported initial assay results from the first holes from the Company's 2016 Phase I drill program at the Company's 100% owned Castle Mountain project located in San Bernadino, California.

The drill program started in mid-June 2016 and has initially focused on the southern portion of the project known as 'South Domes'. The target area hosts a significant portion of the mineral resource that historically has been quantified by shallow vertical reverse circulation drill holes, the current program is utilizing angled diamond core holes designed to cross-cut the known resource and model steep fault structures trending NE-SW.

Assay results from the four hole cross section across the South dome target area include:

O 1.09 g/t Au over 213.7 metres, including 4.14 g/t Au over 16.0 meters in drill hole CMM-079,

O 0.72 g/t Au over 55.2 metres in drill hole CMM-080, and

O 0.72 g/t au over 16.8 metres in drill hole CMM-078 (outside current pit shell).

Osisko Gold Royalties Ltd. (OR-T, \$16.88) – James Bay Portfolio Optioned to Osisko Mining

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochoa@haywood.com

This morning Osisko Gold Royalties announced that it has granted Osisko Mining Inc. (OSK-T, Buy Rating, \$4.00 Target Price) an option to earn 100% of its interest on its portfolio of exploration properties held in Quebec's Jame Bay and Labrador Trough areas that Osisko acquired through the acquisition of Virginia Mines in early 2015. Osisko Mining will have the right to acquire 100% of its ownership in the portfolio in return for time-based exploration expenditures.

Under the terms of the agreement, Osisko Mining may earn 50% of Osisko Royalties' interest following expenditures totaling \$19.2 million, and 100% of its interest upon completing a total investment of \$32 million over a 7 year period.

Osisko Royalties will retain an escalating net smelter return (NSR) royalty ranging from 1% to 3.5% on the properties.

As part of the agreement, Osisko Royalties will exercise its previously negotiated option (June 30, 2015) on properties held by Osisko Mining as of August 25, 2015. Under the terms of the agreement, in return for a cash payment of \$5 million, Osisko Royalties will receive a 1% NSR royalty on Osisko Mining's Windfall property and Urban Barry property package.

Osisko Mining Inc. (OSK-T, \$2.18) – Windfall Site Visit Showcases A Property With Room to Grow

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochoa@haywood.com

Busy on the Ground, and Set to Get Busier - There are currently 5 active rigs at Windfall as part of a 100,000 metre drill program. 4 rigs are active at Windfall (3 drilling below Red Dog) and 1 regionally, but Osisko is looking to increase drills both at the deposit and regionally. We expect to see this program expand by as much as 50% to utilize the proceeds of the recent \$25M flow-through financing.

More Data = Better Model - Osisko is re-logging historic core to better understand the geologic and mineral controls. We expect this work, combined with additional drilling, will generate a larger and more robust model for the resource update. This work demonstrates that the mineable ore zones are relatively wide and there is continuity of higher grade zones between sections.

Roxgold Inc. (ROG-V, \$1.60) – Strong Quarter with Commercial Production Imminent

Tara Hassan, PEng | thassan@haywood.com, Danny Ochoa, PEng, CFA | dochoa@haywood.com

First Quarter Showcases Strong Ramp-Up -The July operational update highlighted a strong ramp-up with throughput, grade, and recoveries all exceeding our expectations. 14,482 oz of gold were produced and a total of 8,250 oz were sold during the quarter at an average price of US\$1,266/oz, generating pre-commercial production revenue of US\$10M. This compares to our expectation of gold sales of 4,040 oz. Commercial production continued to be expected in Q3/16.

Yaramoko Completed Under Budget... - With the exception of the installation of the high voltage powerline, construction was effectively completed during Q2/16 and project capital cost is forecasted to be approx. US\$107M, 3% below budget. Significant progress has been made on the power line and substation construction and an offtake agreement was signed with Sonabel, the national electricity provider. We expect Yaramoko to be connected to the grid in 2017. Roxgold ended Q2/16 with \$51.9M in cash and gold (including \$43.6M in cash, in-line with our estimate of US\$46.7M). Following quarter end received US\$9M from early warrant exercise.

<u>Royal Nickel Corporation (RNX-T, \$0.40) – Beta Hunt Ramp-Up Requiring Patience – We Remain</u> Focused on +2017 Outlook

Stefan Ioannou, PhD | sioannou@haywood.com

Beta Hunt's operating costs are expected to decline as gold production ramps up and grades improve. That said, production since the end of June has moderated around a 34 to 36 koz per annum run-rate and RNC estimates that underground mining progress is currently 4 to 8 weeks behind schedule. We are not surprised to see the emergence of modest ramp-up related 'hiccups' at Beta Hunt (as is typical for most any ramp-up operation) and note that the Company has not encountered any 'fatal flaws' to date. RNC still expects to achieve its 2016E gold production guidance of 35 to 45 koz, albeit now more likely an 'achievable' target vs a 'conservative' target originally (noting H1/16A mine production of 13.2 koz). However, we anticipate the mine will not reach a targeted annualized run-rate of ~60 koz per annum until early 2017 (previously targeted by late 2016). Furthermore, the mine will likely not be 'free cash flow positive' until late 2016/early 2017 (vs a previous target of late Q3/16). We have always viewed 2016 as a ramp-up year at Beta Hunt and continue to look to the mine's +2017 potential, which remains underpinned by a strong outlook that's stands to garner a market re-rating of RNC's share price in the context of an established junior gold producer.

Important Information and Legal Disclaimers

This report is neither a solicitation for the purchase of securities nor an offer of securities. Our ratings are intended only for clients of Haywood Securities Inc., and those of its wholly owned subsidiary, Haywood Securities (USA) Inc., and such clients are cautioned to consult the respective firm prior to purchasing or selling any security recommended or views contained in this report.

Estimates and projections contained herein, whether or not our own, are based on assumptions that we believe to be reasonable. The information presented, while obtained from sources we believe reliable, is checked but not guaranteed against errors or omissions. Changes in the rates of exchange between currencies may cause the value of your investment to fluctuate. Past performance should not be seen as an indication of future performance. The investments to which this report relates can fluctuate in value and accordingly you are not certain to make a profit on any investment: you could make a loss.

Haywood Securities, or certain of its affiliated companies, may from time to time receive a portion of commissions or other fees derived from the trading or financings conducted by other affiliated companies in the covered security. Haywood analysts are salaried employees who may receive a performance bonus that may be derived, in part, from corporate finance income.

Haywood Securities, Inc., and Haywood Securities (USA) Inc. do have officers in common however, none of those common officers affect or control the ratings given a specific issuer or which issuer will be the subject of Research coverage. In addition, the firm does maintain and enforce written policies and procedures reasonably designed to prevent influence on the activities of affiliated analysts.

Dissemination of Research

Research reports are disseminated either through electronic medium or in printed copy. Clients may access reports on our website, or receive publications directly via email. Haywood strives to ensure all clients receive research in a timely manner and at the same time. It is against our policy for analysts to discuss or circulate their recommendations internally prior to public distribution. This policy applies equally to recommendation changes, target changes and/or forecast revisions.

For Canadian residents: Haywood Securities Inc. is a Canadian registered broker-dealer and a member of the Investment Industry Regulatory Organization of Canada, the Toronto Stock Exchange, the Toronto Venture Exchange and the Canadian Investor Protection Fund and accepts responsibility for the dissemination of this report. Any Canadian client that wishes further information on any securities discussed in this report should contact a qualified salesperson of Haywood Securities Inc.

For U.S. residents: This investment research is distributed in the United States, as third party research by Haywood Securities (USA) Inc. Haywood Securities (USA) Inc. is a wholly owned subsidiary of Haywood Securities Inc., registered with the U.S. Securities and Exchange Commission, and is a member of FINRA and the Securities Investor Protection Corporation (SIPC). Haywood Securities (USA) Inc. as a U.S. registered broker-dealer accepts responsibility for this Research Report and its dissemination in the United States. Any U.S. client that wishes further information on any securities discussed in this report or wish to effect a transaction in these securities should contact a qualified salesperson of Haywood Securities (USA) Inc. Haywood Securities Inc. Research Analysts are considered Foreign Research Analysts to the USA and are not registered/qualified as Research Analysts with FINRA. As these analysts are considered Foreign Research Analysts *they may not be specifically subject to FINRA* (formerly NASD) Rule 2711 and FINRA (formerly NYSE) Rule 472 restrictions on communications with a Subject Company, Public Appearances and trading securities held by a Research Analyst Account.

This report may be distributed in the following states: nil. Otherwise, this report may only be distributed into those states with an institutional buyer state securities registration exemption.

Analyst Certification

We, Colin Healey, Mick Carew, Benjamin Asuncion, Geordie Mark, Kerry Smith, Stefan Ioannou, and Tara Hassan, hereby certify that the views expressed in this report (which includes the rating assigned to the issuer's shares as well as the analytical substance and tone of the report) accurately reflect my/our personal views about the subject securities and the issuer. No part of my/our compensation was, is, or will be directly or indirectly related to the specific recommendations.

Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY –The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in this category are expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company's stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

Overall Risk Rating

Very High Risk: Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

High Risk: Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

Medium-High Risk: Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital

Moderate Risk: Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.
