Gold Sheds Early Week Gains Following Positive U.S. Jobs Data Surprise Friday

July U.S. non-farm payrolls data surprised to the upside pre-market Friday morning, coming in at 255,000 versus expectations for an employment gain of 180,000, suggesting the U.S. domestic economy is perhaps more sound fundamentally than some expected. This had negative implications for gold where the most active futures contract fell \$26/oz (\downarrow 2.1%) during the day Friday to close at \$1,341/oz, likely in-part reflecting the increased potential for a future interest rate hike by the U.S. Fed, which is watching economic data closely. An interest rate hike should lend relative strength to the U.S. Dollar, a thesis which was validated Friday as the USD performed strongly against most currencies. The U.S. Dollar was up ~1.2% versus the Canadian dollar Friday, substantially offsetting the USD losses for Canadian investors in physical gold, which fell only 0.3% in CAD terms. The U.S. and Canadian big-boards responded positively to the economic data out of both countries Friday, posting triple-digit gains, with the DJIA up 191 points (\uparrow 1.0%) and the S&P/TSX up 120 points (\uparrow 0.8%), leaving both up on the week, while the TSX Venture exchange fell 0.1% Friday on the back of the equity response to falling metals and energy prices, but managed a 1.3% gain on the week. Silver, Platinum and palladium were lower, finishing at \$19.71 (\downarrow 3.2%), \$1,146 (\downarrow 0.2%) and \$696 (\downarrow 2.0%) per ounce respectively. Base metals were mixed; lead (\downarrow 2.0 %), and copper (\downarrow 2.9%) were down to \$0.81 and \$2.17 respectively, while nickel (\uparrow 0.8%) and zinc (\uparrow 1.0%) rose to finish at \$4.84 and \$1.03 per pound respectively. The WTI crude price fell 0.9%, while the UxC Broker Average Price of uranium was up (\uparrow 0.5%) closing at \$26.25 per pound on Friday.

Macroeconomic News

United States: July data showed strong growth in nonfarm payrolls with an increase in 255,000 jobs for the month, which bettered expectations of 180,000. These data were also presented concurrently with an upward for June data to 292,000 jobs (was 287,000 jobs). Earlier in the week continuing claims data came in at 2.138 million with initial claims coming in at 296 thousand, a little greater of 262 thousand expectation. The unemployment rate now reportedly stands at 4.9%. Other data released on Friday showed an increase in the average workweek to 34.5 hours, and an increase in average hourly earnings in the month of July by 0.3%. With the new July jobs data out late in the week, the spotlight is now back on the US Fed on whether it will, or won't raise rates in September: markets showed their directional bias as precious metals dropped after the data release.

United Kingdom: Mark Carney, Canadian and Bank of England Governor, was in the limelight this week as the BOE halved benchmark rates to 25 basis points, and adopted a £60 billion pound stimulus program to purchase government over the next 6 months. In addition to this stimulus measure the BOE announced other measures to purchase corporate debt and facilitate the transference of the aforementioned cut to borrowers from lending banks. This collective approach was engage to help stimulate the UK's economy to transcend its exit process from the EU. Such policy engagement could be the first of more to come as many BOE policymakers expect that a subsequent cut to the benchmark to close to zero is likely to be enacted prior to year's end.

Canada: Statistics Canada reported that 71,400 full time positions were lost in July with part-time positions growing 40,200 over the same period translating into a total loss of 31,200 jobs last month, which was in contrast with analyst estimates of job growth for the month of 10,000. Unemployment now resides at 6.9%, up 0.1%. Ontario headlined the job losses last month with employment dropping 36,100 jobs. In contrast, the province of British Columbia exhibited growth of 12,100 jobs, and now enjoys a country-wide low unemployment rate of 5.6%. Manitoba and New Brunswick also showed gains in total employment, while Alberta, Newfoundland and Labrador witnessed jobs atrophy over the period. GDP Data released by Statistics Canada showed the Canada enjoying a growing GDP deficient with June witnessing a \$3.63 million deficit, which was somewhat larger than economist projections for a \$2.82 billion deficit for the period.

Japan: Early in the week, Japan's government cabinet approved a ¥28.1 trillion economic stimulus plan that incorporates ¥13.5 trillion in fiscal stimulus measures that comprised ¥6 trillion in low cost loans and ¥7.5 in additional spending. These plans are designed to facilitate the government's broader scale objective to moving the economic into surplus by fiscal 2020.

Australia: kicked off a week of central bank stimulus with the Reserve Bank of Australia dropping benchmark rates by a further 25 basis points to a record low of 1.5%, which has marked a radical slide from the heady heights of 4.75% about 5 years ago. Such a cut in rates was aimed at combating low inflation with a mindset that there now exists diminished risk to the housing market bubble with such a move in interest rates.

Radar Reports and Flashes

<u>Hudbay Minerals Inc. (HBM-T, HBM-N, \$6.51) – A Strong Quarter in Light of Late Concentrate</u> <u>Shipment – Liquidity Improving</u>

Stefan Ioannou, PhD | sioannou@haywood.com

The solid Q2/16 financials were underpinned by 101 Mlb of corporate copper production (in concentrate) at an average total (C1) cash cost of US\$0.83/lb produced net of credits from Constancia (Peru) and Manitoba (Canada) combined-a notable improvement over Q1/16A production of 86 Mlb at US\$1.15/lb (which was in part impacted by scheduled mill repairs at Constancia). Our model (conservatively) includes 365 Mlb of copper production (in concentrate) this year at an average total cash cost of US\$1.15/lb net of credits.

Nevsun Resources Ltd. (NSU-T, \$4.32) – Something for Everyone – Zinc Production in Eritrea, Copper-Gold Development in Serbia, Second-to-None Exploration Potential, and a Peer-Leading Dividend

Stefan Ioannou, PhD | sioannou@haywood.com

Nevsun plans to monetize additional precious metal stockpiles this year. Our model includes ~US\$40M in added revenue (100% basis) from the sales of said material through H2/16, in turn boosting 2016E attributable CFPS to US\$0.25 in our model (from ~US\$0.20). Recognizing the Company's commercial production profile is facing a gap in Q3/15, as Bisha transitions from supergene copper to primary copper-zinc production, we would not be surprised to see Nevsun look to backfill its Q3/15 sales with efforts focused on monetizing its precious metal stockpile.

Energy Fuels Inc. (UUUU-NYSE.MKT, \$2.25; EFR-T, C\$2.90) – Maiden NI 43-101 Resource Estimate for Alta Mesa ISR Project Confirms Historic

Colin Healey, MBA | chealey@haywood.com

Maiden NI 43-101 Resource for Alta Mesa - EFR closed the acquisition of Mesteña Uranium, which owned the Alta Mesa ISR uranium project in South Texas, in June 2016. At announcement of the move to acquire (March 2016), we commented that EFR had significant in-house experience with the Alta Mesa assets (see below), and that experience represented a key de-risking factor in assessment of the target assets. The maiden resource estimate for Alta Mesa confirms identical tons/grade of the 'Historic' resource, which was part of the basis of acquisition.

B2Gold Corp. (BTO-T, \$4.24) - B2Gold Q2/16 Financials Preview

Geordie Mark, PhD, FAusIMM | gmark@haywood.com, Benjamin Asuncion | basuncion@haywood.com

Q2/16 Forecasts - We expect B2Gold to deliver operating cashflow of US\$0.08 per share for the quarter with the production of 135 koz gold at a cash operating cost \$505/oz and AISC of \$943/oz. B2Gold is slated to table Q2/16 financials pre-market on August 4th with a conference call to follow at 10 am Pacific (1 pm Eastern) accessible via 1-416-340-8527. 2016 Expectations - We project 2016 production of 533 koz gold at a cash operating cost of \$529/oz and AISC of \$955/oz. We expect the Company to generate operating cashflow of US\$0.31 per share with revenues totaling US\$687 million and EBITDA of US\$307 million.

Mountain Province Diamonds Inc. (MPV-T; \$6.55) – Gahcho Kué: Initial Diamond Production on Ramp Up to Q1'17 Commercial Production

Geordie Mark, PhD, FAusIMM | gmark@haywood.com, Benjamin Asuncion | basuncion@haywood.com

Gahcho Kué Update: Gahcho Kué has now reportedly completed commissioning with ramp up to commercial production underway and commercial production targeted for Q1/17. In the update the company stated that kimberlite was first exposed on the 23 rd March and kimberlitic material was first introduced into the plant on the 20 th June with first diamond production being achieved on the 30 th June. Further, the operation has now pre-stripped >20 million tonnes of waste material to enable

sufficient access to kimberlitic ore material for processing ramp up. Importantly, the Company announced the recovery of two gem quality 10.8+ carat stones (24.65 carat and 12.10 carat) during this initial processing phase, which is consistent with some of the original bulk sample data returned for these kimberlites. Of note the Company announced that the first split of diamond production from Gahcho Kué between Mountain Province and De Beers is scheduled for mid-September with first diamond sales expected to occur prior to year-end

<u>Denison Mines Corp. (DML-T, C\$0.67; DNN-US, \$0.51) – Q2`16 Results In-Line – Progress with</u> Canadian Exploration Programs the Highlight

Colin Healey, MBA | chealey@haywood.com

FQ2`16 Financial Summary: in-Line - Denison posted a net loss from continuing operations of \$3.8 M (\$0.007 per share), on Revenue of \$3.7 M (Exhibit 2). A total net loss inclusive of discontinued operations of \$4.3M (\$0.008 per share) included a non-cash impairment charge totalling \$2.17 M, relating to the optioning of DML's interest in the Moore Lake project to Skyharbour Resources. Cash Flow from Operations came in at ~\$(3.7) M for Q2`16, and \$(2.5) M YTD`16. Working capital position remains strong (US\$14.2 M), and current cash equivalents (US\$17.8 M) fully support the balance of the 2016 exploration budget, before accounting for receipt of the US\$10 M contingent payment due from Uranium Industry A.S.

NexGen Energy Ltd. (NXE-T, \$2.33) – Arrow Site Visit Reaffirms Thesis – Premium Asset with Big Growth Potential

Colin Healey, MBA | chealey@haywood.com

A1 Shear Zone: the potential of the A1 shear zone to host significant uranium resources is improving with each drill hole cutting the zone; in addition to its basic resource prospectivity based on results thus far, A1 has the potential to host a high-grade 'sub-zone' analogous to the A2 sub-zone, based on similarities between holes drilled on the margin of the A2 sub-zone, and those returned from A1.

Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY –The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in this category are expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company's stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

Overall Risk Rating

Very High Risk: Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

High Risk: Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

Medium-High Risk: Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital

Moderate Risk: Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.

Risk Profile Parameters - Mining and Minerals Sector

Forecast Risk: High (7-10) – The Company's primary project(s) is at an earlier stage of exploration and/or resource delineation whereby grades, tonnages, capital and operating costs, and other economic/operational parameters are not yet reliably established. Moderate (4-6) – The Company has taken steps to de-risk its primary producing, or soon to be producing project(s) and has established reasonably reliable operational and economic parameters. Low (1-3) – The Company has de-risked the majority of its primary project(s) through operational history and established production profile(s).

Financial Risk: High (7-10) – The Company's near- and medium-term (capital) expenditure considerations, including the current year or next forecast year, are not fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations—successful project execution depends, in part, on future (equity) financing(s). Existing and/or forecast levels of leverage are above average relative to the Company's peer group. The risk of a significant capital cost overrun(s) is high given the early stage of project development. Moderate (4-6) – The Company's near-term (capital) expenditure program, in the current year or next forecast year, is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Medium-term funding requirements will likely require additional financing consideration, but should be achievable assuming no significant uncontrollable events impede access to capital. Existing and/or forecast levels of leverage are in-line with the Company's peer group. The risk of a significant capital cost overrun(s) is moderate given the advanced stage of project development. Low (1-3) – the Company's near- and medium-term (capital) expenditure program is fully funded through a combination of established debt facilities, cash on hand, and/or anticipated cash flow from existing operations. Existing and/or forecast levels of leverage are below average relative to the Company's peer group.

Valuation Risk: High (7-10) – The current valuation is at a premium to peers. The valuation reflects considerable future exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the "DCF" evaluation by more than 50%. **Moderate (4-6)** – The current valuation is within historic ranges and generally consistent with peers. The valuation reflects reasonable exploration success and/or commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by 15% to 50%. **Low (1-3)** – The current valuation is at the low end of historic ranges and at a discount to peer valuations. The valuation reflects limited new exploration success and no commodity appreciation. Where applicable, the current capitalization exceeds the DCF valuation by less than 15% or falls below the current market value.

Political Risk: High (7-10) —Obtaining permits is challenging. Properties are located in an area(s) with high geo-political uncertainty, limited access, and/or have significant new infrastructure requirements. Moderate (4-6) — Properties are located in an area(s) with moderate geo-political risk, reasonable or manageable access, and some established infrastructure. Low (1-3) — Properties are located in areas with a manageable geo-political risk profile and established access/infrastructure.
